How to refine your search results

- A Change the radius of your search.** By default the search will show dentists within 15 miles of a given location, but you can adjust this distance by clicking on **Refine search** and selecting any distance from “5 miles” to “60 miles” from the drop-down menu.
- B Filter your results.** Refine your search results by categories such as specialties and languages.

The screenshot shows the 'Find a Dentist' interface. At the top, there is a search bar with the text 'Dentist, office or keyword' and a location field set to 'San Francisco'. A '+ Refine search' link is visible next to the location field. Below the search bar, a map of San Francisco is displayed, showing various neighborhoods and landmarks. To the left of the map, a list of dentists is shown, including Charles Nip, Albina Batchaeva, and Tiklat Issa. Each dentist listing includes their name, title, network affiliations, and contact information. A callout box labeled 'A' points to the '+ Refine search' link, and another callout box labeled 'B' points to the 'Refine search' menu that appears when the link is clicked. The menu includes options to 'Sort by' (Best Match, Distance) and 'More filters' (Networks, Specialties, Languages, Extended office hours, Office access, Board-certified).
